

THE STRETCH PROTECTOR

Finally a device that not only dispenses stretch film but PROTECTS it!

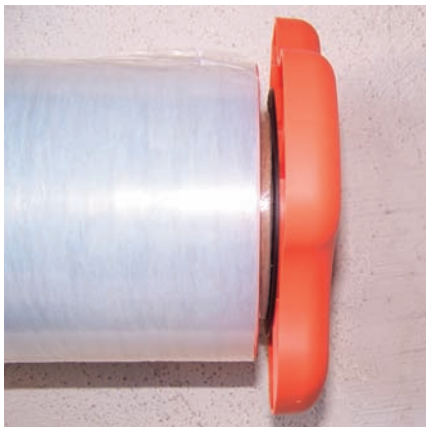

The roll of film is "cradled" above the ground!

The "Stretch Protector" is an exciting addition to the stretch film dispenser market. When a roll of film is dropped, nothing protects the edge of the roll from getting damaged.

The user either rolls off many layers of film to get past the "ding" or simply gets frustrated and changes film suppliers.

Great for use with ECCO Supreme Stretch Film to control tension and reduce friction and heat build-up.

This dispenser that extends wider than the diameter of the roll, it dispenses and protects at the same time. With stretch films getting thinner in gauge the need for film edge protection is even greater.

The Stretch Protector pays for itself by ensuring every inch of film gets used.

Use with any standard 3" core stretch wrap.

Made in the USA.

Free set with every pallet of ECCO Supreme Stretch Hand Wrap

Your Cost \$9.85/Set.
